

In The Beginning: A Secular, Satirical Reading of the Best Selling Book of All Time

In The Beginning offers an abridged reading of the holy book found in Christian homes and churches as viewed from a secular perspective. Commenting both on familiar stories, and on those that are never discussed at Sunday School or preached from the pulpit, it offers up a dose of humour mixed with some serious commentary. Sometimes willfully naive, sometimes irreverent, and sometimes just a bit serious, this book analyzes the printed words of the holy book, and not the imaginative interpretations of generations of theologians. The central character in the story is a being who exists outside of space and time as we perceive it, who is orders of magnitude more intelligent than any human, who is so different from us that we cannot even begin to imagine him, and who configured our entire cosmos in just six days. His name is Tom, and he is an irresponsible youth living in a star system known as Ko, in a parallel universe. Well, who did you think I was talking about? The universe that Tom designs turns our far from perfect, but he does make an honest effort to do the right thing. Sadly, he just can't seem to get any cooperation whatsoever from the dominant species on the one little planet that he decided to infuse with the miracle of life. ... The author of In The Beginning is an unapologetic atheist who is a Scientist at heart. This self-appointed qualification requires no degrees from prestigious universities, although it doesn't pay very well either. Nevertheless, it is a very inclusive appellation, and In The Beginning invites readers to join the loosely defined organization of Scientists and the Scientifically Minded.
