

Art + Science Now

In the face of ridicule and cultural prejudice, the artists/scientists in this book show that good art and good science are not so very different, and that when they find their joint niche, their joining can make something powerful, interesting, and beautiful. The Art Book In the twenty-first century, some of the most dynamic works of art are being produced not in the studio but in the laboratory, where artists probe cultural, philosophical, and social questions connected with cutting-edge scientific and technological research. Their work ranges across disciplinesmicrobiology, the physical sciences, information technologies, human biology and living systems, kinetics, and roboticstaking in everything from eugenics and climate change to artificial intelligence. Art + Science Now provides an overview of this new strand of contemporary art, showcasing the best international work. Featuring some 250 artists, it presents a broad range of projects, from body art to bioengineering of plants and insects, from computer-controlled video performances to large-scale visual and sound installations. 270+ color illustrations
