

# Baryon Number Violation at the Electroweak Scale: First Yale-Texas Workshop Yale University 19-21 March 1992

A record of the proceedings of the meeting which addressed the question of whether baryon number violation can occur - in the standard model of weak electromagnetic interactions - at rates which can be relevant to cosmology and particle experiments. There have been a great deal of activities and many results recently, and the meeting was the first occasion for a comprehensive review of the field.
