

Fabric: The Fired Earth Book of Natural Texture

Of all the materials we use to enhance our interiors, none is more pleasing to our senses than fabric. From nubby linens to silky sheers, *Fabric: The Fired Earth Book of Natural Texture* will lead you deep into the sensuous world of textiles. Designers Elizabeth Hilliard and Stafford Cliff urge the reader to look at decorating with a fresh eye, and their book is brimming with new ideas. Each chapter is organized by texture: Natural looks at cottons and knits; Luxurious explores suedes and velvets; Translucent covers sheers and lace. Also taking the reader through satins and metals, as well as embossed, quilted, and printed fabrics, the authors then move on to Color: Simple and Exotic, exploring important color themes and explaining dyeing techniques. Drawing on striking and unusual imagery from the world around us, and filled with exquisite design images, including contemporary interiors, this gorgeous book will forever change the way you think about fabric in your home.
