# The Web of the Worlds

This must be another world altogether, separate from his own in time and space. He wasnt sure about the details?it had been a long time since he had read H. P. Lovecraft?but this theory seemed the most tenable.Grant OReilly was not the adventurous type. A sheltered invalid as a child, who used books for accompaniment, he had barely begun to live his life before the great change occurred. Suddenly, about to be married, he is taken by a seizure to wake in a land like none he had known before. Plucked by accident by the fates, he is carried away to a medieval world of wintry weather and barbaric battles. Berl-Cats, fire salamanders and Alkahar ghouls, existed in this world. He will have to toughen to this strange, brutal worldor die in it!
