

Urban Disaster Survival

It seems that every time we turn around there is a new crisis or reason to worry about a disaster happening in our backyard. More people live in cities now than at any other time in our history which makes us more vulnerable to urban disasters. So you have to ask yourself, if there was an urban disaster where you live, would you be ready? How to Survive and Urban Disaster is designed to give you the basic tips and ideas that will help to ensure that you are ready whether the disaster is natural or man made. This book is filled with useful information for someone who is just beginning to realize that disasters might happen that they need to prepare for and for the more experienced prepper who is looking for new ideas and tactics that they can incorporate into their survival plans. Inside the book you get easy to implement ideas on such crucial tactics as the easy way to start creating an emergency food and water supply, what specific tools and other supplies that you might need, what you need to keep in communication with family and friends, how to know what is going on around you, and tips on generating power for lighting and your other needs. There is even a section on basic emergency first-aid and the importance of stockpiling your medicines. It then goes on to give specific ideas on important survival tactics such as deciding whether to hunker down or evacuate, what to do if your supplies run low, how to protect your family and the importance of creating a safe room. Finally, the book looks at a number of different possible disaster scenarios and gives specific tactics for how you and your family can survive through them.
