

## Gorgon: Alex Hunter 5

An ancient evil awakens...Alex Hunter has been found sullen, alone, leaving a path of destruction as he wanders across America. Only the foolish get in the way of the drifter haunting the streets late at night. Across the world, something has been released by a treasure hunter in a hidden chamber of the Basilica Cisterns in Istanbul. Something hidden there by Emperor Constantine himself, and deemed by him too horrifying and dangerous to ever be set free. It now stalks the land, leaving its victims turned to stone, and is headed on a collision course with a NATO base. The Americans cant let it get there, but cant be seen to intervene. There is only one option they need their best HAWC. Alex Hunter, code name Arcadian. But the HAWCs are not the only ones seeking out the strange being Uli Borshov, Borshov the Beast, who has a score to settle with the Arcadian, moves to intercept him, setting up a deadly collision of epic proportions where only one can survive. Join Alex Hunter as he learns to trust his former commander and colleagues again as the HAWCs challenge an age-old being straight from myth and legend.
