

Review of Immunology, 1e

Here's the perfect review book for USMLE exam preparation and for immunology courses! A companion to Drs. Abbas and Lichtman's Cellular and Molecular Immunology and Basic Immunology, it focuses on the key experimental observations that underlie the science of immunology at the molecular, cellular, and whole organism level as well as the conclusions that can be drawn from these observations. Chapters follow the organization of the parent textbooks and feature a brief summary of vital knowledge. Approximately 500 USMLE-style review questions and answers with rationales. Contains 500 United States Medical Licensing Exam (USMLE) style questions to help readers prepare for success on Step 1 of the Boards. Features page references to Cellular and Molecular Immunology and Basic Immunology with each review question to make further study easy. Incorporates current understandings of basic science as well as new research findings to put up-to-date knowledge at the readers' fingertips. Considers the implications of immunologic science for the management of human disease. Includes color illustrations and images from the parent textbooks.
