

Dangerous (Element Preservers) (Volume 1)

In the world of elemental magic, losing your heart to the wrong person might be more dangerous than having magic disease... Ria is an 18-year-old girl who has just started going to the University of Magic, a special university for those who have one of the four elements: fire, water, air and earth. There she meets Michael, a boy whose element is different from hers, which makes their romantic involvement seem impossible because mixing of elements can have horrible consequences. She also feels threatened by Adrian, a very dangerous magic disease carrier. Rias best friend, Paula, is fascinated by Adrian like most of the girls at the University and wants him to help her with her research about the disease. All Rias beliefs are put to test when she starts having the symptoms of the disease and the only person she can turn to is Adrian. Young Adult Fantasy/Romance for mature teens.
