

Sea Change

London 1721. William Spandel is deeply in debt and desperate. Sir Theodore Janssen, director of the recently collapsed South Sea Company, Spandel's major creditor, comes to his rescue. But there is a catch. Spandel must secretly deliver a package to Amsterdam to a man named de Vries, a friend of Janssen. A man of his word, Spandel delivers the package as promised, but things soon take a turn for the worse. He narrowly escapes an attempt on his life, only to find himself accused of murdering de Vries. Then de Vries' secretary and wife go missing, along with the secret package. Spandel senses that he has become a pawn in a game of international proportions involving many players. British government agents, among others, are hot on his trail, convinced that the package contains secret details concerning the great South Sea financial scandal, information so explosive it could spark a revolution in England. Spandel believes his only chance is to find the package and to place it in the right hands. But he's not sure whose hands. And he is definitely not sure what the package contained.
