

The Black Moon: Book II of The Black Moon Chronicles

The mischievous bog goblin Tet Snailbiter and his pal Grog Agog, a demigod made of stone, earth and his divine mothers moonlight, are supposed to be returning the elderly human witch Gresel to the safety of the faerie, sprite and dryad dominated Shimmering Forest so that she wont have her charged bones turned into wands by the residents of Quake Keep, not helping her steal magic weapons from its dungeons to help defeat the approaching Sandragon Army. But so it goes in the lives of reluctant and unlikely heroes. Along with resplendent goddesses made of moonlight brawling through their minions both mortal and supernatural, brass runeddoors that transform into sabertooth tigers, a lightning bolt summoning sword, enchanted armor that can neutralize the powers of deities and dozens of intelligent bipedal species here on the magical world of Yooba, The Black Moon is packed with intrigue and unexpected plot twists. Yet its really about the heroism and villainy lurking inside us all, who we choose to be in the dead of the night. A strange little sorceress arriving at Quake Keep, the leo garrison and human staff fall in love with Lilith due to her enchanted adoration cloak. Yet she has bad news. A white hole is about to open in the dungeons due to the spectral activity of its disgruntled former customers and the power leaking out of the magic weapons stored therein between wars. As rifts in the very fabric of the world, white holes can be used to march armies to distant lands with but a few steps. Sent by the Spell Guild, Lilith must seal it off lest it be used to take Quake Keep from within, then the ancient melting pot that is the city of Ooliphant. Shielded by the magic boots and belt he stumbled on and kept without telling anyone, the dungeon errand boy Ivan is the only one who doesnt fall under her spell. Illusioned to appear human and really here to unleash a swamp horde, Lilith is the spiderkin daughter of the Endless Morasss

Black Widow. Starfarer founders having abandoned Ooliphant, its ripe for the plucking. Yet her nemesis Torfulgar Rainmaker, the lightning-laced little brother of the Badlands Feathered Serpent who also covets its tax revenue, has set a trap. Even as the Black Moons mighty Sandragon Army marches toward Quake Keep from her Whirling Desert and Tet, Grog and Gresel gather their own guerilla army of birds, insects and small woodland creatures by blowing the enchanted Mountain Goat Horn they stole, Lilith and Torfulgar duel. Evenly matched, it all hinges on Ivan and the agility of his foxtrot boots and inhuman strength of his ogrearms belt. Having big plans for this brave and resourceful lad, the Black Moon herself might be forced to intervene.
