

The Red Gold (The Viking Series Book 3)

The Red Gold by John Snow is the third book in The Viking Series. After a disastrous fire, Sigve the Awful decides to rebuild the old hall, but in one of the post holes, the thralls find a gold hoard hidden under the stone footing. Its a huge treasure trove, but how big is it, and who buried the gold there? Sigves guardsmen have spotted a large warship sailing towards Vik, and in order to defend the gold, the young chieftain may once again depend on Yljali, his thrall lover. Only she can unleash the hidden powers of his magic sword. Yljali, however, is in labour, giving birth to Sigves child. In this third book Sigve is dragged further into the struggle between the powerful claimants to the Norwegian throne. The young and unexperienced leader must use all his wits and strength to defend his property and his people; he may even depend on the gods. In Snows Viking stories, rune magic and shape shifting are no fantasies but facts of reality. The life of Sigve the Awful is weaved by the Norns, but Sigves prosperity also depends on his own courage, on Odins cunning, and on Thors strength. Luckily, Sigve can ask Grim for advice, but often the sages answers are difficult to understand. In The Viking Series John Snow tells exciting stories, and based on thorough research, he gives a very realistic interpretation of life in the Viking Age.
